Dr. Harmon MacAllister,
Research Director
Council for Tobacco Research
900 Third Avenue
New York, New York 10022

Dear Dr. MacAllister,

I am writing to request research proposal forms to apply for support from the Council for Tobacco Research for our research project on the role of papillomaviruses in the etiology of laryngeal cancer. You may recall our conversation several months ago when we briefly discussed the project and the possibility of support. I have enclosed a reprint describing some of the pertinent results from my laboratory. I am writing for the revised application forms that you said would be available in September for the November deadline. If you need any additional information, then please call me at the number below. Thank you for your consideration.

Sincerely yours,

Phoebe Mounts
